

Shopping Calculator

Group 6: Devin Tran, Kenneth Carbonell and Andy Vera

Brief Explanation

- Our application is a Shopping Calculator
- A user can use it to enter an item with its price and calculate what the total can be
- Sales Tax is taken consideration due to cities having different tax rates and not all items being tax
- Any transaction can be saved and shown

Licensing

Our project is licensed under the GNU GPL Licenses due to our project being done in Qt which has that license

This means that under the GPL license, anyone can:

- Use it
- Distribute it
- Modify it

without any fees

GNU GENERAL PUBLIC LICENSE

Version 3, 29 June 2007

Copyright © 2007 Free Software Foundation, Inc. <<https://fsf.org/>>

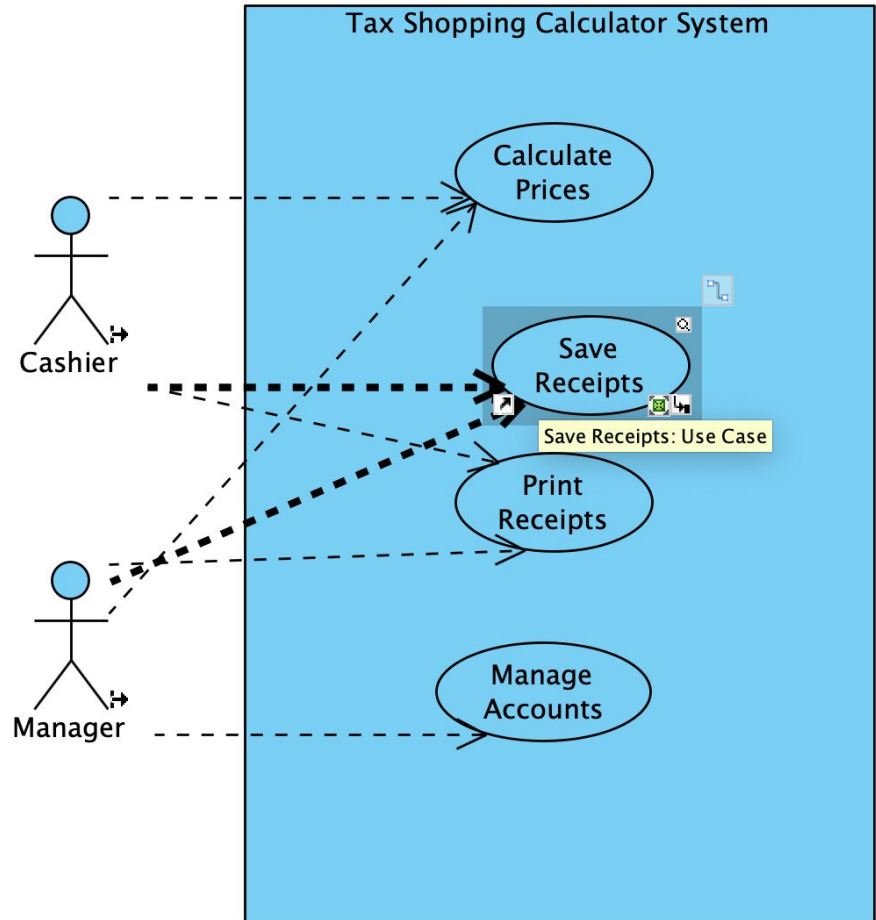

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

Preamble

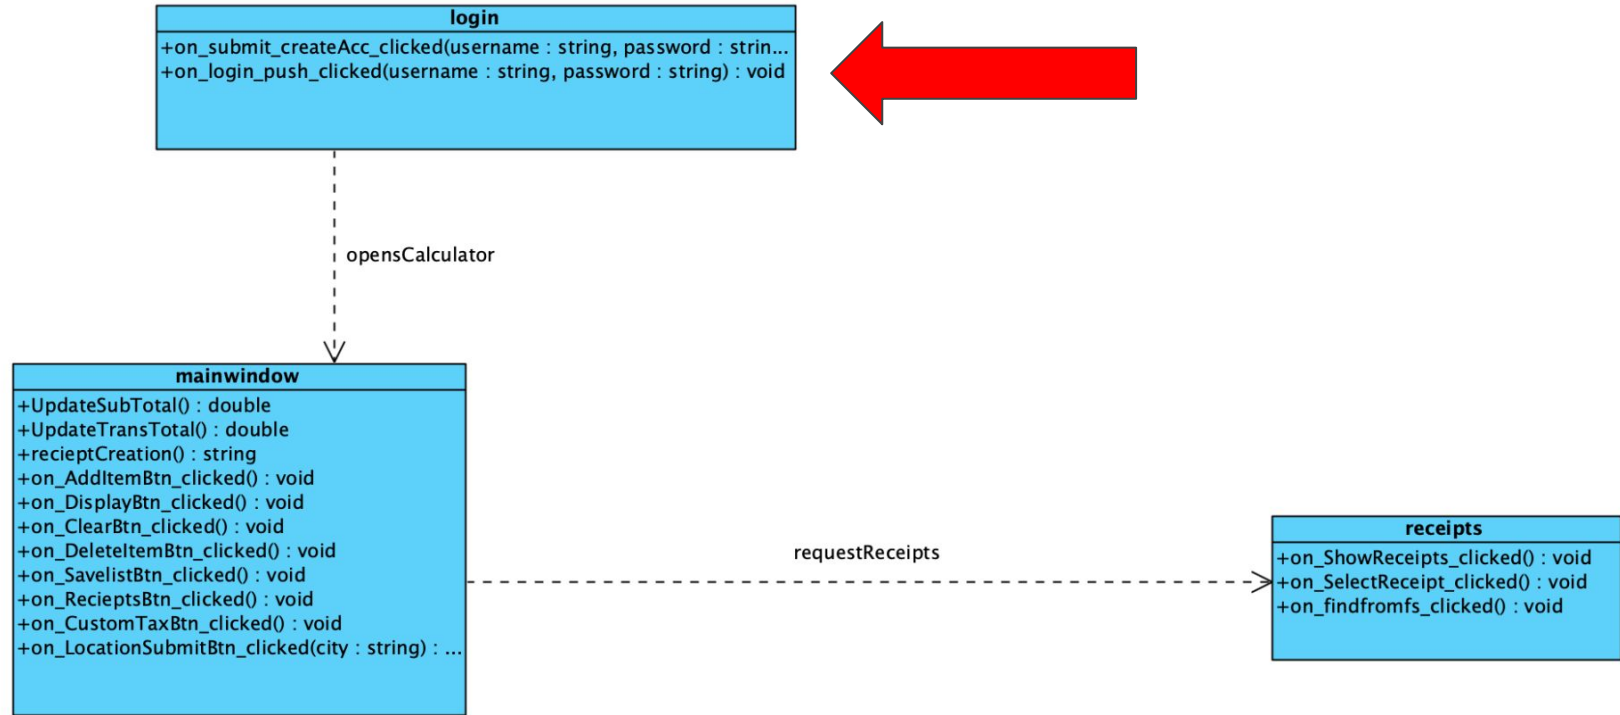

The GNU General Public License is a free, copyleft license for software and other kinds of works.

The licenses for most software and other practical works are designed to take away your freedom to share and change the works. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change all versions of a program--to make sure it remains free software for all its users. We, the Free Software Foundation, use the GNU General Public License for most of our software; it applies also to any other work released this way by its authors. You can apply it to your programs, too.
